

WORKSPACE SHIELD

# CLEANING AND MAINTENANCE INSTRUCTIONS

## Cleaning Instructions

### Workspace shield

Regular cleaning using proper procedures and compatible cleaners is recommended to keep the vinyl looking clear. For general cleaning, it is recommended that the following instructions and cleaning agents be used.

### CLEANING PROCEDURES

1. Rinse both sides of the Workplace shield with lukewarm water.
2. Wash Workplace shield with a mild soap and lukewarm water.
3. Use a soft cloth or sponge and gently wash with an up and down Rinse the cloth or sponge and change the water often. DO NOT SCRUB or use brushes or squeegees. Repeat rinse and dry with a soft cloth to prevent water spotting.

We suggest to use mild dish detergent or a mixture of vinegar and water as a cleaning agent.

If you want to use a stronger cleaning agent, please reference the PVC Chemical resistance chart to check if it might cause damage.

### Disclaimer

For both disinfection and cleaning we suggest using Seventh Generation Disinfecting Multi-Surface Cleaner.

Using any other cleaner or disinfecting agents will void the warranty of the PVC fabric.

## Maintenance Instructions

### Preventing Static

To help dissipate any possible PVC static we suggest the use of 3M Anti Static spray cleaner. This can be found online or at office supply chains.

If that is not available to you, rub a dryer sheet along the inside and outside of the PVC.
